tion. Capability sourcing is an organizing process to gain access to best-in-class capabilities for all activities in a firm's value chain to ensure long-term competitive advantage. In this paper, capability sourcing modeling is introduced as a technique to create sourcing alternative solutions to facilitate strategic sourcing decision making.

### **Capability Sourcing Modeling - UGent**

For purposes of this paper, Strategic Sourcing will be defined as the process of evaluating, selecting and aligning with suppliers or consortiums of suppliers to achieve operational improvements in support of an organization's strategic objectives. The phrase Strategic Sourcing was coined and is used when the activities of sourcing are directly tied to a sourcing strategy.

### **Strategic Sourcing: Building a foundation for success**

The individual sourcing practices considered include global sourcing practices, green sourcing practices, joint green activities with suppliers, non- contractual risk management, contractual risk management, electronic co-ordination, supplier visibility, supplier involvement in new product development, sourcing analytics, and supplier development.
