The history of laptops describes the efforts in the 1970s and 1980s to build small, portable personal computers that combine the components, inputs, outputs and capabilities of a desktop computer in a small chassis. Before laptop/notebook computers were technically feasible, similar ideas had been proposed, most notably Alan Kay's Dynabook concept, developed at Xerox PARC in the early 1970s.

Recently in the comments on how to draw Miasma, tangler Suzanne asked for some tips on drawing grids: "General Question: how best to practice making grid based designs. I'm having difficulty establishing an equal base grid." My response to Suzanne's question prompted her to suggest it would make a good tips section.
