History. District heating traces its roots to the hot water-heated baths and greenhouses of the ancient Roman Empire. Usually, a hot water distribution system in Chaudes-Aigues in France is regarded as the first real district heating system. It used geothermal energy to provide heat for about 30 houses and started operation in the 14th century.

Never use mechanical heating and cooling as a substitute for good design. However, for existing homes, installation of high efficiency heating and cooling technologies, with modest building improvements and behaviour change, may be cheaper options to reduce energy bills and greenhouse gas emissions than major home renovations.
