The Centre for Cellular & Molecular Biology (CCMB) is a premier research organization in frontier areas of modern biology. The objectives of the Centre are to conduct high quality basic research and training in frontier areas of modern biology, and promote centralized national facilities for new and modern techniques in the inter-disciplinary areas of biology.

Molecular biology / m ɛ™ ɛˆ | ɛˆ k j ɛš | ɛ™r / is a branch of biology that concerns the molecular basis of biological activity between biomolecules in the various systems of a cell, including the interactions between DNA, RNA, proteins and their biosynthesis, as well as the regulation of these interactions. Writing in Nature in 1961, William Astbury described molecular biology as:

### **Molecular biology - Wikipedia**

The Molecular, Cellular, and Developmental Biology department conducts research and trains undergraduate and graduate students in the science and technology of modern micro-biology at the University of Colorado Boulder. This discipline includes laboratory benchwork, computational analysis, and field work (both clinical and environmental) to investigate questions in biology.

### **Molecular, Cellular & Developmental Biology | University**

Molecular biology is the study of biology at a molecular level. The field overlaps with other areas of biology, particularly genetics and biochemistry. Molecular biology chiefly concerns itself with understanding the interactions between the various systems of a cell, including the interrelationship of DNA, RNA and protein synthesis and learning how these interactions are regulated.

What is evolution? Evolution is a result: heredity + variation "Descent with modification" Fact:

evolution has occurred – Began as a hypothesis – Not falsified, though falsifiable – Theory: evolution is a body of explanatory principles – Embodies a mechanism: natural selection, itself a result of: – “Variation in fitness (ability to survive to reproduce)

Molecular Cell is a companion to Cell, the leading journal of biology and the highest-impact journal in the world. Launched in December 1997 and published monthly, Molecular Cell defines the field of molecular biology with a relatively small number of significant papers, up to 15 articles per issue. Coverage will extend from structure to human diseases, concentrating on molecular analyses.
