Molecular Electronics Conference 2018. Following the success of the previous editions of ElecMOL 1-8 (2002, 2004, 2006, 2008, 2010, 2012, 2014 and 2016), We are pleased to announce the 9th edition of the international conference ElecMol9 which will be held in Paris at the Sorbonne University in December 2018. The main purpose of the conference is an up-to-date scientific exchange on recent ...

The inherent specificity and electrochemical reversibility of enzymes poise them as the biorecognition element of choice for a wide range of metabolites. To use enzymes efficiently in biosensors, the redox centers of the protein should have good electrical communication with the transducing electrode, which requires either the use of mediators or tedious biofunctionalization approaches.

Supramolecular systems. Molecular self-assembly is a key concept in supramolecular chemistry. This is because assembly of molecules in such systems is directed through noncovalent interactions (e.g., hydrogen bonding, metal coordination, hydrophobic forces, van der Waals forces,  $\pi$ - $\pi$  interactions, and/or electrostatic) as well as electromagnetic interactions.

### **Molecular self-assembly - Wikipedia**

Molecular nanotechnology (MNT) is a technology based on the ability to build structures to complex, atomic specifications by means of mechanosynthesis. This is distinct from nanoscale materials. Based on Richard Feynman's vision of miniature factories using nanomachines to build complex products (including additional nanomachines), this advanced form of nanotechnology (or molecular ...
