Multiple Wiener Ito Integrals With Applications To Limit

Here non-linear functionals of stationary Gaussian fields are considered, and it is shown that the theory of Wiener-Itô integrals provides a valuable tool in their study. More precisely, a version of these random integrals is introduced that enables us to combine the technique of random integrals and Fourier analysis.

Wiener-Itô integrals in the multi-dimensional time case. On the other hand, a large class of non-linear functionals over Gaussian fields can be represented by means of multiple Wiener-Itô integrals. In this work we are interested in limit problems for sums of dependent random variables.
