The Roxbury E+ project is located in a dense urban neighborhood with a complex history. Despite a superior location, excellent amenities, access to mass transit, beautiful green spaces, and a fine historic building stock of single- and multi-family residences, the neighborhood has been disinvested and underutilized, with many low-income residents and vacant properties.

New Urbanism is an urban design movement which promotes environmentally friendly habits by creating walkable neighborhoods containing a wide range of housing and job types. It arose in the United States in the early 1980s, and has gradually influenced many aspects of real estate development, urban planning, and municipal land-use strategies.. New Urbanism is strongly influenced by urban design ...

(See also the Form-based section of the Zoning in the United States article.). A Form-Based Code (FBC) is a means of regulating land development to achieve a specific urban form. Form-Based Codes foster predictable built results and a high-quality public realm by using physical form (rather than separation of uses) as the organizing principle, with a lesser focus on land use, through municipal ...
