General The Linux networking kernel code (including network device drivers) is a large part of the Linux kernel code. Scope: We will not deal with wireless, IPv6, and multicasting. â€œ Also not with user space routing daemons/apps, and with security attacks (like DoS, spoofing, etc.) . Understanding a packet walkthrough in the kernel is a key to

Basic Networking Tutorial - a network is any collection of independent computers that communicate with one another over a shared network medium. A computer network is a collection of two or more connected computers. When these computers are joined in a network, people can share files and peripherals such as modems, printers, tape backup drives, or CD-ROM drives.
