The New Open Economy Macroeconomics (henceforth NOEM) is a leading development in international economics starting in the early 1990s. Its objective is to provide a new theoretical framework for open economy analysis and policy design, overcoming the limitations of the Mundell-Fleming model, while preserving the empirical wisdom and

has is an emerging new economic order. The geography of wealth is being reshaped by our tools. We now live in a new economy created by shrinking computers and expanding communications. This new economy represents a tectonic upheaval in our common-wealth, a far more turbulent reordering than mere digital hardware has produced.

Abstract. Within only a few years, the new open economy macroeconomics (NOEM) has emerged as a potential rival to the Mundell-Fleming framework, as modified by Dornbusch and others in the 1980s and 1990s using linear-quadratic models, as the dominant analytical framework in the study of open economies.

formal theory is never integrated into the way students think about economic issues. We provide students with a vehicle to understand the structure of economics, and we train them how to use this structure. A New Organization Traditional books are organized around theoretical constructs that mean nothing to students.

was an "invisible hand" turning the wheels of the economy: a market force that keeps the economy functioning. Microeconomics looks into similar issues, but on the level of the individual people and firms within the economy. It tends to be more scientific in its approach, and studies the parts that make up the whole economy.

economic growth) suggest that macroeconomics is about the economy as a whole. In part this is correct: macroeconomics does focus on how the whole economy evolves over time rather than on any one sector, region, or firm. Yet macroeconomics also considers the important issues from the perspective of the firm and/or the individual consumer.
