Relativity should not be considered weird or paradoxical; it is just the geometry of spacetime. A good qualitative understanding of the essential ideas can be achieved just by using diagrams to show the correspondence between spacetime and ordinary space. This does not require much beyond high-school notions of geometry, trigonometry, and vectors.

The reason for this warping of time, believe it or not, is the speed of light. Light is the fastest thing in the universe and the universe likes keeping it that way. For that reason, things get weird the closer you get to travelling at light speed (300,000 km/s or 186,000 mps).
