The original and most important application of CO methanation is the removal of carbon monoxide from syngases, e.g. in ammonia production processes and later upstream proton-exchange membrane fuel cells .CO methanation gained importance for the production of SNG during the oil crisis in the late 1970s.

Review on methanation – From fundamentals to current

Fundamentally based indexes are indices in which stocks are weighted by one of many economic fundamental factors, especially accounting figures which are commonly used when performing corporate valuation, or by a composite of several fundamental factors. A potential benefit with composite fundamental indices is that they might average out specific sector biases which may be the case when only ...
