If you look around in the literature and also in the internet, then the amateur self-made instruments (ATM) in the last 50 years has hardly developed. There are indeed bigger telescopes built today than 50 years ago, other materials are used, other motor-types and it has been added some electronic whistles, but basically come still the same old and supposedly proven designs back.

Illumination. The intensity of moonlight varies greatly depending on its phase, but even the full Moon typically provides only about 0.05-0.1 lux illumination. When the Moon is at perigee and viewed around upper culmination from the tropics, the illuminance can reach 0.32 lux. The full Moon is only about one-millionth as bright as the Sun. [citation needed]

Table 2, based on the Army's 77 BCT program, shows the changes in terms of Army battalions. The Army's decision to increase the number of maneuver companies in its modular heavy BCT battalions from three to four makes it necessary to consider the number of combat maneuver companies as well as the number of battalions.
