2. Ins and Outs of IRB Registration. 3. Personalized Medicine Development. Ensuring the quality of a clinical trial in today's challenging drug development climate hinges on several important elements, perhaps none more crucial than the start-up phase, where much of the groundwork for a product development program is built.

### **Streamline and Improve Study Start-Up | Applied Clinical**

We obtained information about prerandomisation tumour characteristics, clinical tumour response, surgery, recurrence, and mortality for 4756 women in ten randomised trials in early breast cancer that began before 2005 and compared NACT with the same chemotherapy given postoperatively.

Cancer immunotherapy (sometimes called immuno-oncology) is the artificial stimulation of the immune system to treat cancer, improving on the system's natural ability to fight cancer. It is an application of the fundamental research of cancer immunology and a growing subspecialty of oncology. It exploits the fact that cancer cells often have molecules on their surface that can be detected by the ...
